Summary

DevOps Engineer with hands-on experience in building and maintaining CI/CD pipelines, cloud infrastructure, and automation workflows. Currently working as a Software Engineer Intern at Amazon, with practical exposure to AWS services, containerization, and deployment strategies. Skilled in improving system reliability, optimizing performance, and collaborating with cross-functional teams to deliver scalable and efficient solutions.

Education

Indore Institute of Science and Technology <i>Bachelor of Engineering in Information Technology</i>	Aug 2022– May 2026 <i>Indore, Madhya Pradesh</i>
---	--

Experience

Amazon <i>Software Engineer Intern</i>	Jan 2026 – Present <i>Hyderabad, Telangana</i>
--	--

- Working on cloud-based infrastructure and deployment pipelines using AWS services.
- Assisted in designing and maintaining CI/CD pipelines using tools like GitHub Actions/Jenkins to automate build, test, and deployment workflows.
- Collaborating with development and operations teams to enhance system reliability, monitoring, and scalability.
- Gaining hands-on experience with containerization, automation, and DevOps best practices.
- Applied data validation, governance policies, and quality checks to ensure compliance and accuracy of datasets.
- Engineered metadata-driven ETL frameworks for dynamic pipeline execution, monitoring, and configuration management.
- Troubleshoot deployment and system issues, contributing to improved reliability and faster resolution times.

Sparkup Technology Pvt. Ltd. <i>Full-Stack Developer Intern</i>	Aug 2024 – Oct 2024 <i>Indore, Madhya pradesh</i>
---	---

- Built and maintained scalable full-stack web applications using React.js, Node.js, and MongoDB.
- Designed and implemented RESTful APIs for seamless integration between frontend and backend systems.
- Utilized **Android Studio**, **Git**, and **VS Code** Optimized application performance and resolved bugs in collaboration with cross-functional teams.

Projects

Multi-Service Application	Jan 2026
----------------------------------	-----------------

- Designed and implemented a multi-service containerized application including React frontend, Node.js API, MongoDB database, Redis cache, and Nginx reverse proxy.
- Used Docker Compose to orchestrate multiple containers with proper service dependencies and networking.
- Built custom Docker images for frontend and backend using optimized Dockerfiles.
- Used Docker volumes for persistent storage of MongoDB and Redis data.
- Implemented logging and log rotation for better monitoring and debugging.

Technical Skills

Programming Scripting: C, C++, JavaScript, TypeScript, Basic Python

Frontend and Backend Technologies: React.js, Node.js, Express.js, Java Servlets, Tailwind CSS, Bootstrap

Relevant Subjects: Database Management Systems (DBMS), Operating Systems (OS), CN, DSA

DevOps and Cloud Tools: Docker, Docker Compose, Jenkins (CI/CD), Git, Nginx

Databases: MongoDB, MySQL

Tools and Platforms:: VS Code, WSL, Postman, Docker, Jenkins

AI Tools: GitHub Copilot, Cursor, Claude Code, Vercel v0

Certifications

- IBM Certified: Web Development (HTML5, CSS3, JavaScript)
- Oracle Cloud Infrastructure (OCI): AI, ML and Deep Learning Foundations.
- AWS Academy Graduate: Cloud Foundations (Core concepts of cloud computing, security, and deployment)
- IBM Certified: SQL and Relational Databases
- Hackathon Participant: 24-Hour Hackathon – IIST Indore
